value!**

*When you connect your machine...*

**You can:**

- Monitor alerts and view in-cab display from wherever you are
- Monitor machine location, its prior path, and coverage
- Monitor fuel level and idle time
- See what's happening now and learn from your performance over time
- Collaborate with others who support your operation, granting them easy, instant access to the data they need so they can give you better support and insights
- Direct your business by creating action plans, prioritizing jobs, and communicating next steps to others

**Kibble Equipment can:**

- Monitor alerts coming from your machine
- Diagnose problems remotely to get you running faster
- View the in-cab display to help you setup your machine
- Perform software updates from Kibble Equipment
